

PARTS & SERVICE NEWS

REF NO.	AA02106
DATE	April 15, 2002

SUBJECT: TRANSMISSION FILTER MOUNTING BRACKET

PURPOSE: Introduce to the field new transmission filter mounting bracket (EJ9767).

APPLICATION: Komatsu Mechanical Drive Dump Trucks:
 530M: A30036 thru A30038;
 HD1500-5: A30039 thru A30059

FAILURE CODE: 15B5PC

DESCRIPTION:

Some trucks in the field may be equipped with transmission filter mounting brackets that interfere with the mounting of the filter canisters. The result of this interference may lead to premature failure of the filter, as well as, breakage of the filter mounting head.

A new filter mounting bracket (EJ9767) has been manufactured with greater tolerances for mounting of the filter canisters. The new bracket replaces the previous bracket (EH8754).

Existing brackets may be modified to the specifications shown in Figure 1.

Truck units A30060 and up are equipped with the new mounting bracket.
