| REF NO. | AA02208 |
| DATE | August 30, 2002 |

- SUBJECT:** ENGINE AIR INTAKE TUBE SUPPORT SYSTEM
- PURPOSE:** Inform the field of a kit for replacing air intake tube supports for better strength and stability.
- APPLICATION:** Komatsu 730E Dump Trucks AFE47-A thru AA, A30079 thru A30214 equipped with Cummins K2000E or Komatsu SSA16V engines
- FAILURE CODE:** AA00ZC
- DESCRIPTION:** Air Intake Tube Support Kit (XK0179)

Some trucks in the field, equipped with Cummins K2000E or Komatsu SSA16V engines, may experience failures with air intake supports. Air Intake Tube Support Kit (XK0179) has been developed to provide a stronger support system for intake tubing. Refer to Figure 1 for improvements in support rods and clamps. Table 1 contains a complete listing of parts included in the kit. Each kit contains a drawing with installation instructions along with a complete set of tube supports.
