

# PARTS & SERVICE NEWS

REF NO.	AA02233
DATE	October 17, 2002

**SUBJECT:** VISOR KIT FOR DIMMING MOM DISPLAY BRIGHTNESS

**PURPOSE:** Introduce to the field a kit for additional dimming of MOM display brightness.

**APPLICATION:** Komatsu Mechanical Drive Dump Trucks:  
530M: A30001 thru A30038, 32628;  
HD1500-5: A30039 & Up

**FAILURE CODE:** EB10Z9

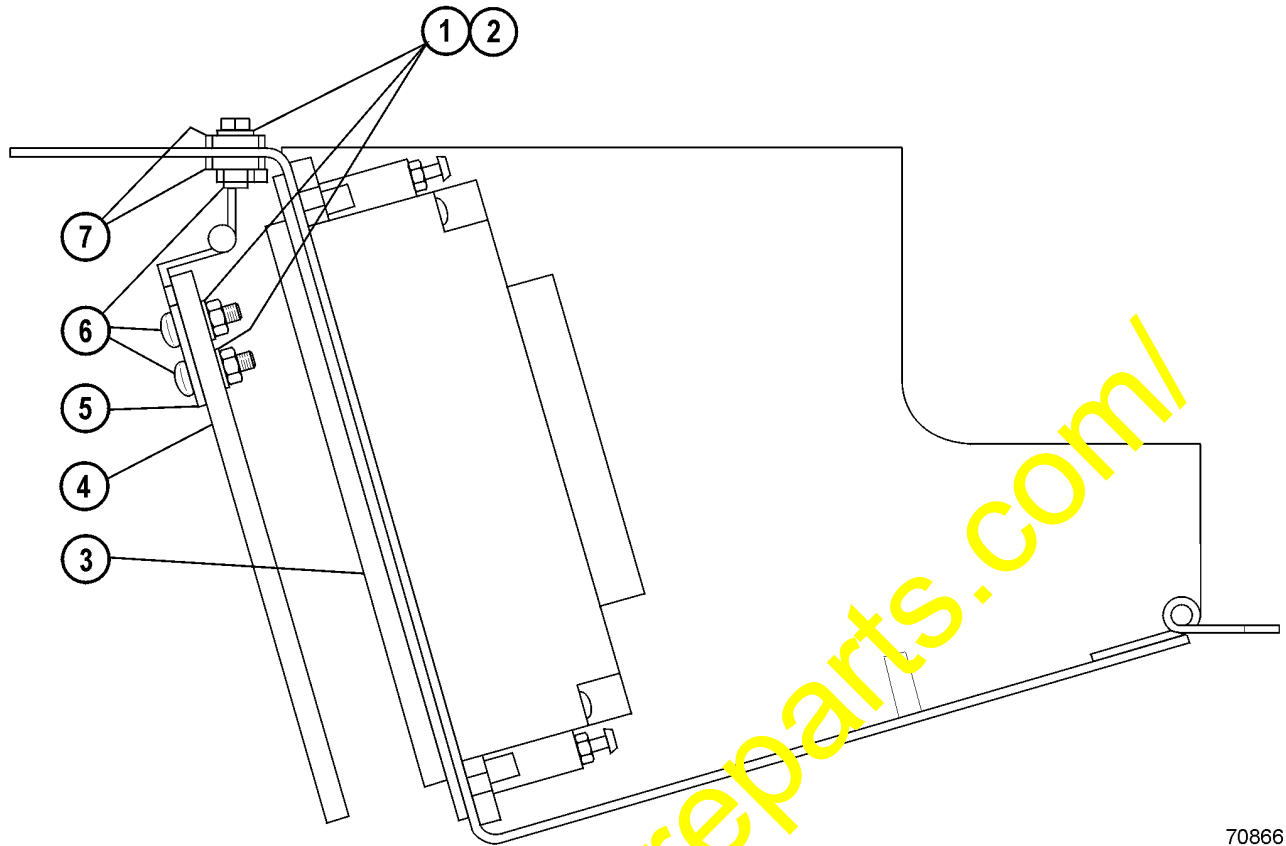

**DESCRIPTION:** MOM Display Visor Kit (XK0159)

Truck operators that continue to have visual problems with the Message for Operator and Maintenance (MOM) display due to excessive brightness may wish to install MOM display visor kit (XK0159). The kit includes a visor and the necessary hardware for mounting over the MOM display. Visor (4, Figure 1) is mounted with hinges (5) that allow the visor to swing in and out of position depending on specific lighting conditions. Table 1 contains a complete listing of kit contents. An installation drawing that includes hole locators and specifications is included in the kit.

*NOTE: Trucks operating without a MOM display dimmer switch may upgrade to the current arrangement to date. Refer to Parts & Service News Bulletin "REPLACEMENT MOM (MESSAGE for OPERATOR and MAINTENANCE) DISPLAYS (7818 92 2003) and MOM WIRING REWORK KIT (XK0025). ALSO PMC UPGRADES", AA02064.*
