REF NO.	AA97049B
DATE	November 19, 1997

This PARTS & SERVICE NEWS supercedes AA97049A dated August 26, 1997 and should be discarded.

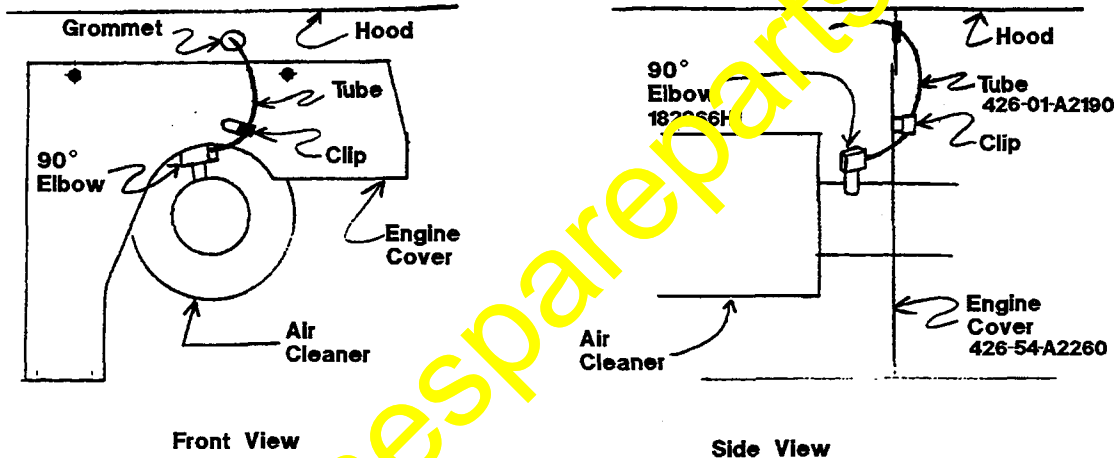

SUBJECT: REPOSITIONING OF DUST INDICATOR TUBE

PURPOSE: To eliminate interference between dust indicator tube and engine cover plate.

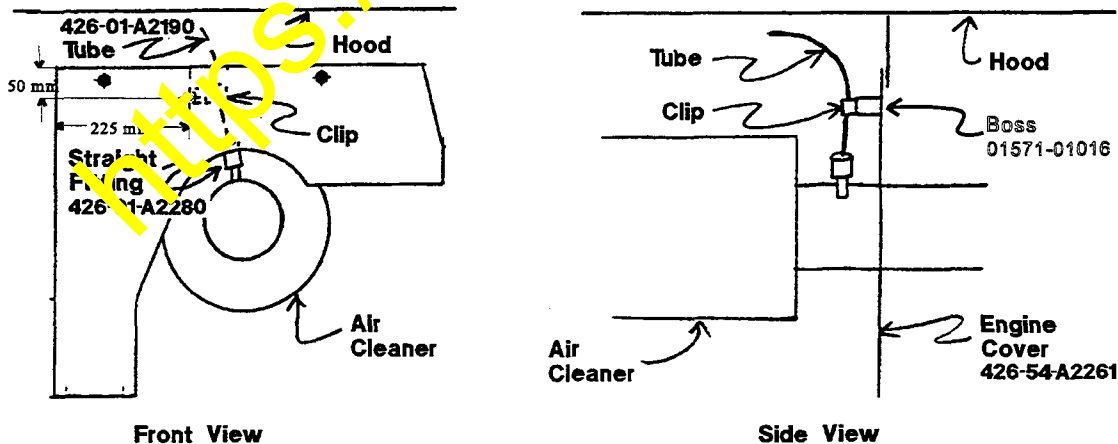

APPLICATION: WA600-1LE Wheel Loaders Serial Number A51001 to A51043.

DESCRIPTION:

The original design has the tube (1200 mm in length) running from a 90° elbow, under the engine cover, through a clip and then through a grommet in the hood top.

The improved design has the tube (1050 mm in length) running from a straight fitting up through a clip.

Note: Engine Cover P/N 426-54-A2260 can be reworked into P/N 426-54-A2661 by adding the Boss P/N 01571-01016 per the above sketch.
