SUBJECT: Chip indicator (contamination switch) at the main pumps
PN 906 281 40; 903 382 40 (ass'y.)

PURPOSE: Avoiding of malfunctions

APPLICATION: PC4000 (SN 08151 – 08155); H 455S (15009);
PC5500 (15011 – 15019); PC8000 (12037 – 12041)

FAILURE CODE: DT00MA

DESCRIPTION:

For simplification of the monitoring system and avoidance of error messages the chip indicators are not more used in the hydraulic system.

1. Remove the cable of the chip indicators (a) and insulate it carefully (or remove it at the X2 board (b) - refer to the electric circuit diagram).
2. Replace the chip indicators with:
 - cover plug (PN 767 448 73) and
 - seal (PN 767 433 73).
